Technical Specification

Materials	PP
Approval	All raw materials and masterbatches used in the production process have the appropriate food contact
Colours	White available. Other colours available on request
Hot Fill	85–95° C The material chosen has a very good heat resistance and the packaging is suitable for hot filling. Notably, plastic packaging become flexible when subjected to hot filling temperatures and care must be taken in relation to stacking immediately after hot filling. After cooling of the product and pail, the pail regains its original stacking strength Microwave Safe
Cold Temperatures	The standard resin material for white/coloured products resists temperatures down to -20° C. Deep freezing below - 20° C may require a special resin available on request. Standard transparent (CLX) products might become brittle at temperatures below 0° C, and special resins are available on request for applications below freezing. Resins tailored for freezing stability has a lower stackability than standard resin which must betaken into consideration
Storage	The compliance of the product to the technical specifications in this data sheet is guaranteed for 12 months after the date of the delivery subject to suitable storage.
